# ANSWER KEY

## Assessment: Architects of the Mind & Digital Health

**1. Which part of the brain is described as the 'Thinking Headquarters' and is responsible for making smart decisions about screen time?**

A. Occipital Lobe
**B. Frontal Lobe**
C. Brain Stem
D. Cerebellum

**2. Which brain part acts as the 'Balance Master' or 'Pro Gamer,' helping you use a controller smoothly?**

A. Parietal Lobe
B. Temporal Lobe
C. Frontal Lobe
**D. Cerebellum**

**3. What is the primary function of the Temporal Lobe in the context of using technology?**

A. Processing colors and shapes on a movie screen.
B. Managing heart rate and breathing while you play.
**C. Understanding language and storing memories from game stories.**
D. Navigating your fingers across a touchscreen via touch.

**4. What does the term 'Neuroplasticity' describe?**

A. The inability of the brain to change once a person reaches adulthood.
B. A chemical that 'hijacks' the brain when you look at blue light.
C. The automatic system that controls breathing and sleep.
**D. The process of the brain growing stronger connections as you practice hard things.**

**5. According to the 'Architects of the Mind' materials, why is the Frontal Lobe mentioned in relation to the age of 25?**

**A. It is when the Frontal Lobe is fully developed, aiding in better decision-making.**
B. It is the age when the Brain Stem takes over the duties of the Cerebrum.
C. It is the age when the brain stops using dopamine entirely.
D. It is the maximum age a person can learn a new tech skill like coding.

**6. What is the purpose of performing a 'Neural Audit' on your screen time?**

A. To calculate the exact number of neurons in your Parietal Lobe.
B. To program an AI using 'If/Then Logic' to play a game for you.
C. To increase the amount of 'Quick Candy Joy' you receive daily.
**D. To check in with your brain to see which apps make you feel 'stuck' versus 'strong'.**

**7. In the 'Master Builder's Brain Lab,' what does the 'Try-Again Loop' of testing and fixing your work refer to?**

**A. Iterative Design**
B. Prompt Engineering
C. Infinite Scroll
D. Neural Audit

# ANSWER KEY

**8. Which of the following is an example of using tech as 'Output' (Creation) rather than 'Input' (Consumption)?**

A. Watching auto-play videos on a social media feed.
B. Listening to a music playlist without making any changes.
C. Scrolling through a series of photos posted by friends.
**D. Coding a new game or designing a digital story.**

**9. How can technology negatively impact the Brain Stem's 'Auto-Pilot' functions?**

A. Excessive gaming makes the Brain Stem stop controlling heart rate.
B. It can trick the brain into forgetting how to speak.
**C. Blue light from screens can trick the brain into thinking it is daytime, ruining sleep cycles.**
D. Scrolling causes the Brain Stem to lose its ability to process colors.

**10. Which chemical in the brain is often triggered by 'Quick Joy' apps and makes you want to keep scrolling?**

A. Melatonin
**B. Dopamine**
C. Oxygen
D. Adrenaline

**11. The Occipital Lobe is primarily responsible for which part of your tech experience?**

A. Hearing the sound effects in a game.
B. Feeling the vibration of a phone.
**C. Seeing and processing the images on the screen.**
D. Planning which app to open next.

**12. When you use your fingers to type on a keyboard or swipe a screen, which lobe is processing that sense of touch?**

**A. Parietal Lobe**
B. Brain Stem
C. Temporal Lobe
D. Occipital Lobe

**13. What is 'Infinite Scroll' designed to do to your brain?**

A. Help you find information faster.
**B. Make it harder for your Frontal Lobe to decide to stop.**
C. Increase your neuroplasticity.
D. Improve your physical balance.

**14. Which of these is a 'Strong' tech habit?**

A. Using a screen right before bed to relax the brain stem.
**B. Setting a timer to remind your Frontal Lobe to take a break.**
C. Only using apps that provide 'Quick Candy Joy.'
D. Ignoring the 'Try-Again Loop' in coding projects.

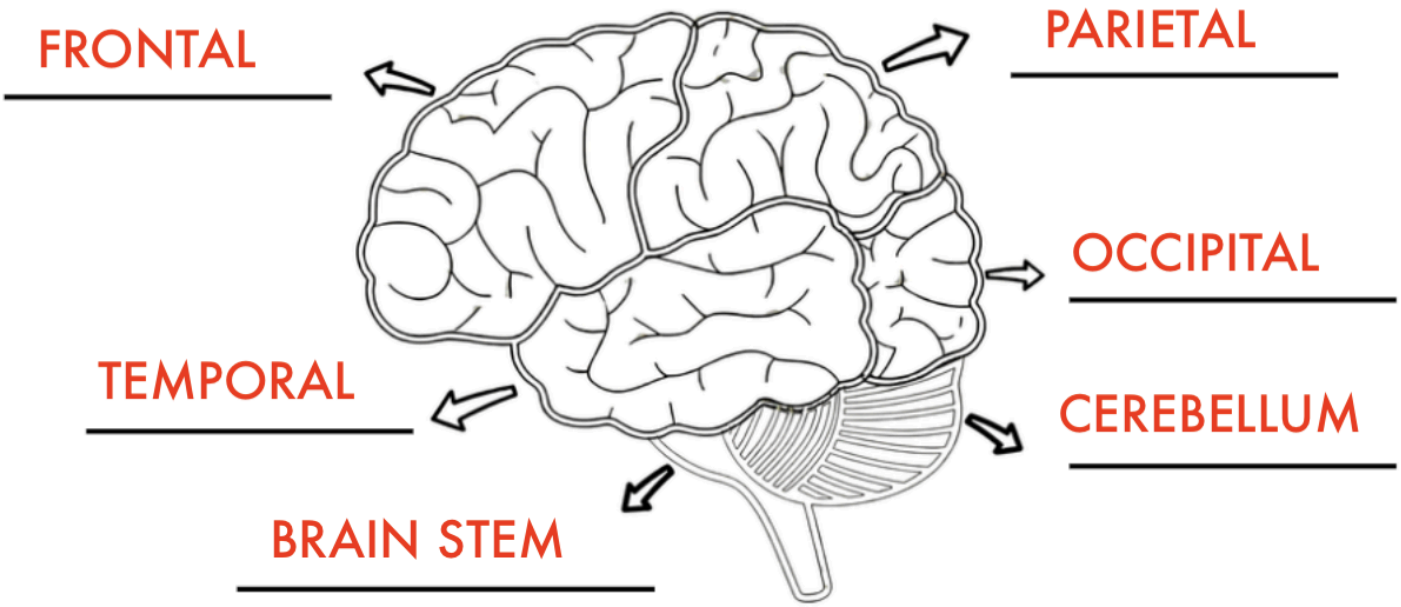
# ANSWER KEY

**15. If your brain is a 'construction site,' which part is the last to be finished?**

A. The Brain Stem
B. The Cerebellum
**C. The Frontal Lobe**
D. The Temporal Lobe

**Label the parts of the brain using the word bank.**

Cerebellum
Frontal Lobe
Parietal Lobe
Occipital Lobe
Cerebrum
Temporal Lobe
Brain Stem



The ____CEREBRUM____ is like the Boss & Feeling Center. It is the biggest part of your brain, kind of like a big office building with four different rooms: The Frontal Lobe, Temporal Lobe, Parietal Lobe, and the Occipital Lobe.
